## NON ACADEMIC PROJECTS

- **Heart Failure Prediction Model**

A Machine Learning Project to visualize data and to explore the relationship between the data set variable and the target variable. I have also compared few Machine Learning Algorithms and have evaluated their performance run against this data set.

## ACADEMIC PROJECTS

- **Face Recognition Based Attendance System**

A Linux based application that runs on face-recognition and OpenCV packages, in this project I created a simple application to detect faces of people and to mark attendance. The results will be saved in a CSV file format for reference.

## CO-CURRICULAR ACTIVITIES

- Completed **Machine Learning using Python** training program conducted by **NIELIT**, Haridwar. In this training program, I learnt about different python libraries such as Pandas, Numpy, Matplotlib and also used different algorithms to work with data sets.
